* Contact Renee Cook at rcook@westernu.edu for a discount code

Cancellations made 10 days in advance of class date are fully refundable less a \$125 administrative fee. If canceled in less than 10 days, there is no refund,

CLASS OVERVIEW

The American Pharmacists Association's (APhA) **Advanced Competency Training (ACT)** is an innovative and interactive advanced competency training (ACT) program that explores the pharmacist's role in providing travel health services to patients. This application-based activity is the first step for pharmacists interested in learning the essential skills necessary to successfully provide travel health services.

Program pre-requisite: Pharmacists must have completed the APhA Pharmacy-Based Immunization Delivery certificate training program and received a Certificate of Achievement or have previously completed an immunization training program and are authorized to provide immunizations in the state in which they practice.

INSTRUCTOR

Jason Wong, PharmD, BCPS, BCGP
Assistant Professor

COURSE GOALS

The goals of this program are to:

- Provide pharmacists with comprehensive knowledge, skills, and resources necessary to establish and deliver a successful travel health service.
- Teach pharmacists to identify at-risk patient populations in need of preventative and travel care.
- Enhance pharmacists' ability to effectively counsel patients on travel health.
- Motivate increased numbers of pharmacists to establish travel health services

There are two components to the APhA Pharmacy-Based Travel Health Services advanced competency training (ACT) program:

- 6.0 hour (0.60 CEU) web based self-study modules with case studies and assessment exam
- 4.0 hour (0.40 CEU) live seminar with assessment exam

KEY LEARNING OBJECTIVES OF THE LIVE SEMINAR

After completing the live seminar, pharmacists will be able to:

- Distinguish the information necessary to obtain from patients to conduct a quality travel health risk assessment.
- Explain elements of a 20-minute pre-travel consultation in the community pharmacy setting.
- Demonstrate appropriate health risk communication and management for international travelers.
- Select appropriate vaccinations to prevent diseases associated with travel to certain geographic regions.
- Justify the use and timing of vaccinations to prevent diseases associated with travel to certain geographic regions.

For a complete list of learning objectives and for all APhA accreditation information and policies, please visit APhA's website, <http://www.pharmacist.com/pharmacy-based-travel-health-services>.
